

Allegra,

In response to your message, below please find our statement. Please confirm receipt. Thank you.

Palmetto Pee Dee remains in compliance with all regulatory agencies and continues to serve and treat patients from South Carolina, as well as out of state.

We currently have 16 patients from Washington state. Over the past year we have successfully treated and returned numerous Washington State children to safe homes.

Washington State representatives, case managers, social workers, and administrators are very involved in their children's treatment while in our care. Washington State DCYF staff are involved in weekly calls, monthly treatment reviews, and they do monthly well checks and quarterly audits to ensure compliance. Additionally, arrangements are made for family visitation and travel.

Our relationship with Washington State remains strong as Palmetto Pee Dee is a provider of choice for children with significant mental health and behavioral disorders.

Thank You,

Daniel J. Eichelberger-CEO
